### 5. Fire Fighting Measures

Flammable Properties	: Flash point : Approx 106 °C Ignition point : Not available Flammable point : Not available
Extinguishing Media	: <u>Suitable extinguishing media</u> Fire-extinguishing powder, fire-fighting foam, carbon dioxide, sand, water spray  <u>Unsuitable extinguishing media</u> High pressure water jet.
Specific hazards arising from product	: When exposed to high temperatures, this product may generate dangerous decompositions such as nitrogen oxides carbon monoxide, carbon dioxide, and sulfur dioxide.
Specific extinguish measures	: Cut off the combustion source to the origin of fire and extinguish by using the appropriate fire extinguishing media. Firefighting measures should be done from windward as much as possible. Take appropriate measures to disallow substances that may affect the environment from being dispersed by the drainage. Remove all containers possible to a safe place promptly. If not possible to remove, cool down the area. Work from windward and avoid inhaling any harmful gases. Use respiratory equipment if necessary.
Special protective equipment and precautions	: Cut off the combustion source to the origin of fire and extinguish by using extinguishing media. Combustion / Flue gases generate carbon monoxide and etc. To avoid the fire from spreading, cool surrounding area with water spray. Extinguish from windward and avoid inhaling any harmful gases. Use respiratory equipment if necessary. Extinguish from the windward where the gases do not accumulate and prevent the leakage from spreading. Wear appropriate protective wear (heat-proof) including air respirators. Wear respiratory equipment for harmful gases are produced from combustion or high temperature.

## Safety Data Sheets

### 6. Accidental Release Measures

Personal Precautions	: Avoid breathing gas / mist/vapours. Wear protective equipment (boots, gloves, and glasses) to prevent contact with skin. Remove ignition sources in the area and work from windward. Clean up immediately when it spills on the floor or any surface. (The floor surface becomes slippery). Prohibit entry other than related personnel. Ventilate released area. Do not touch and/or walk in the spills. The worker wears an appropriate protective equipment, and avoids eyes, the skin contacts, and inhalations. (refer to Section 8) Provide adequate ventilation if indoors. Cordon off the area and prevent entry of non-related personnel. Work from windward and remove personnel downwind of the area. Wear appropriate protective equipment to prevent contact with skin and inhaling fumes. Remove ignition sources in the area promptly. Prepare fire extinguishing equipment in case of ignition.
Environmental precautions	: Avoid releasing to the environment. Collect spillage. Do not empty into drain. If it is mixed with wastewater, drain it after the activated sludge process. Be careful not to influence living organisms and water quality in the environment by products released into rivers and any type of body of water. Contact local authorities if it is flowing into rivers or any type of body of water as necessary. Be careful not to influence the environment by products released into rivers or any type of body of water. If the pollution of water pipes or waterways occur, contact relevant organizations. Clean the area and avoid entry into plumbing system. Be careful not to drain or release untreated waste water into the environment.
Methods and materials for recovery and neutralization	: Contain the flow path with blankets or sand bags and collect into an appropriate container for large spills. Gather and collect into a container for small spills. Prevent the inflow into drains, sewer, basement, or enclosed areas. Clean spills frequently as there is danger of slipping on remnants. Remove all ignition sources. Smoking, open flame or ignition sources are not allowed in the area. Contain with consideration to safety. Collect into open container by absorbing with cloths, rags, sand or etc. and then rinse with plenty

## Safety Data Sheets

of water. Collect what has scattered into a container that can be sealed. Clean the spilled area with a cloth or a rag. Wear appropriate protective equipment throughout the process.
